### GF secures order for new green steel project in key European decarbonization initiative

**GF is contributing to one of Europe's most significant industrial decarbonization projects by delivering a turnkey marine intake and onshore pipeline system for global steel company SSAB at its new green steel plant in Luleå (Sweden). The order reinforces GF's position as a leading provider of advanced infrastructure solutions for large-scale sustainable industrial applications.**

SSAB is building a modern, electrified steel mill with a capacity of 2.5 million tonnes per year, capable of delivering advanced products with significantly lower climate impact, supporting Europe's industrial and climate transition. GF's Industry and Infrastructure Flow Solutions division will deliver the system based on its Weholite solution to ensure a reliable cooling water supply, a critical component in sustainable steel production. The system will supply water to the shoreline pumping station, from where cooling water will be pumped to the steel mill's heat exchangers for use in the steel manufacturing process.

"This project is closely aligned with our strategic focus on higher-value applications that enable more sustainable industrial processes. It also underscores our ability to deliver complex turnkey solutions while we continue to sharpen our portfolio and execution in markets with long-term growth potential," says Thomas Hary, President, GF Industry and Infrastructure Flow Solutions.

The order, awarded by NYAB, a key contractor in the project, includes large-diameter pipelines ranging from DN 800 to DN 1600 mm, with a total length of approximately 12 kilometres, including fittings. GF will also be responsible for welding, assembly and pressure testing of the installed system. The project is scheduled to run from Q2 2026 to Q4 2027.

#### About SSAB

Headquartered in Sweden, SSAB is a global steel company with a leading position in high-strength steels and related services, employing approximately 14,600 people in over 50 countries. [ssab.com](https://ssab.com)

#### About NYAB

NYAB is a specialized contractor providing engineering, project management and construction services across energy, infrastructure and industry, operating in the Nordics and selected international markets. [nyabgroup.com](https://nyabgroup.com)

#### About GF

With a rich history in industrial innovation since 1802, GF is reshaping the future of Flow Solutions by delivering Excellence in Flow through mission-critical products and solutions that enable the safe and sustainable transport of water and other fluids for Buildings, Industry and Infrastructure. Headquartered in Switzerland, GF employs around 13'300 professionals across 46 countries. In 2025, GF's Flow Solutions business generated sales of CHF 3 billion. GF is listed on the SIX Swiss Exchange. For more information, visit [www.georgfischer.com](https://www.georgfischer.com).
